

SMALL AND MEDIUM BUSINESS SOLUTIONS

THE CHALLENGE FOR SMALL BUSINESSES

Growing both quickly and safely can be difficult for small businesses. As a small business owner, you worry about survival. As you grow to a moderate size, you worry about dozens of issues, from continuing to grow your products to sales, to protecting your customers, to beating your competition to market. You want a secure network, but how many people can you justify in your IT department? Security does not have to mean a large IT staff.

But it's difficult to find competitively priced scalable solutions that will grow with your requirements, giving you access to the right skills at the right time.

Foresite is here to be your security services arm. We give you the access to our experts, as well as the depth of resources you need to thrive in today's turbulent threat landscape.

YOUR SOLUTION

By combining cost-effective, leading-edge security technology with managed security services that focus on service excellence, you get a complete service solution, giving you peace of mind for your critical IT perimeter and core infrastructure.

Your security infrastructure will be monitored and managed 24/7/365 by our security experts, providing you full insight into any actions performed through our security portal.

Monitored conditions of interest will be investigated, evaluated, addressed, and remediated, providing your business with full transparency into all the actions taken.
